

Timemore Crystal Eye

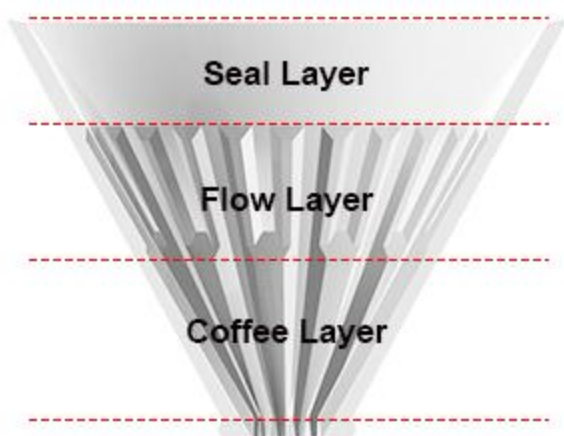

Clear vision, pure precision.

Watch clarity meet craft through crystal-clear glass, where three precision layers and innovative design deliver your cleanest cup yet.

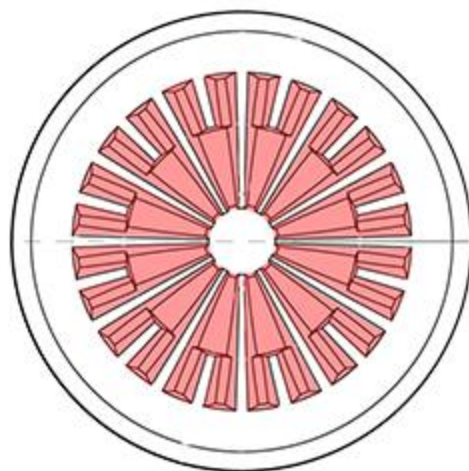

3-Layer Extraction System

Line up your filter paper and brewer for a perfect fit.

Innovative Channel Design

Faster drainage for complete extraction and clean taste.

Perfect Filter Paper Fit

Concave texture ensures tight filter adhesion.

High-Borosilicate Glass

Engineered for durability and transparency.

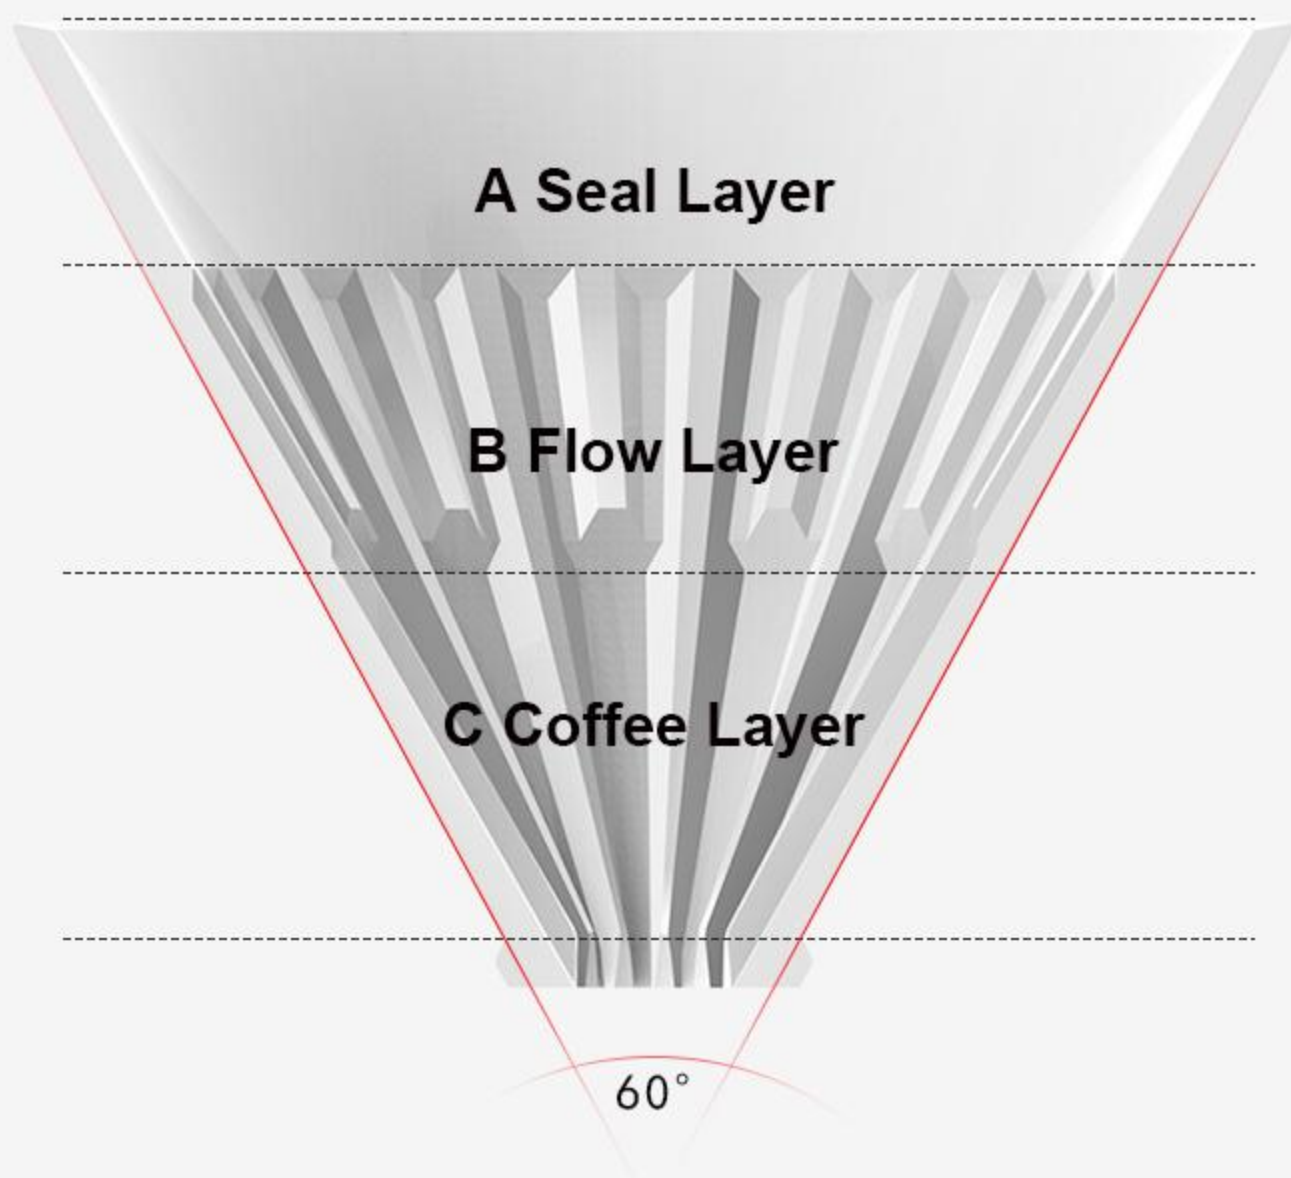

Enhanced Water Flow

Prevents fine sediment buildup and over-extraction.

Flavor in layers.

The Crystal Eye Dripper's design maximizes every angle of the brewer. The upper lip secures the filter, while the mid and lower sections optimize air and water flow, delivering fast, high-extraction brews.

A Seal Layer

The broad lip maximizes filter contact for a tight seal, keeping the paper in place.

B Flow Layer

Precision ridges and channels manage pressure, maintaining an even flow and preventing stalls.

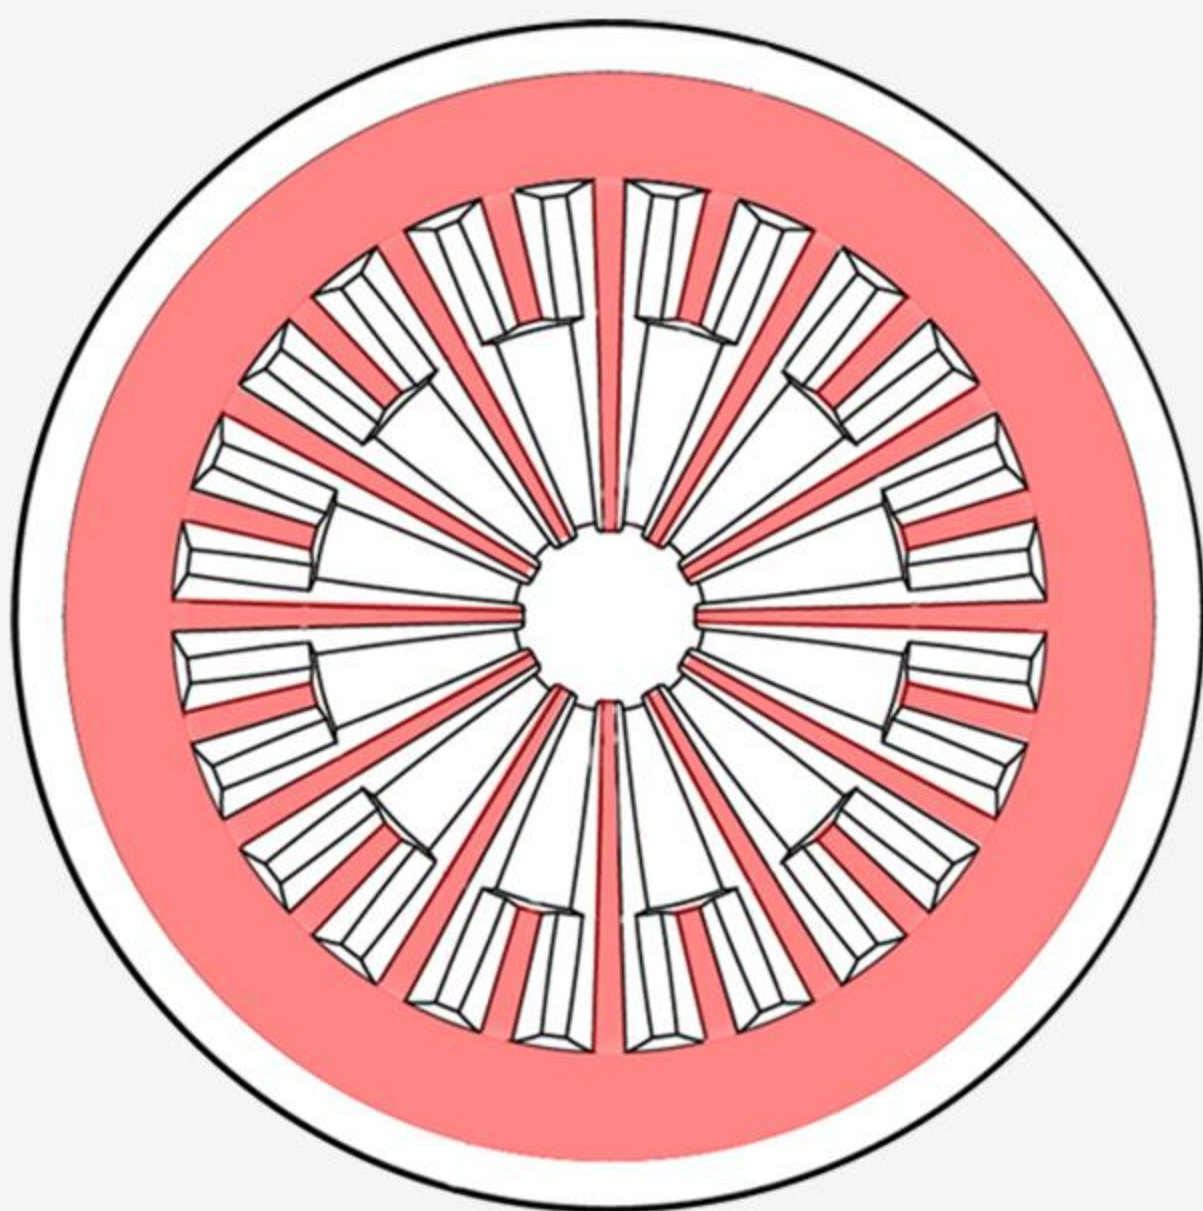

C Coffee Layer

Staggered grooves stabilize the filter and channel water for thorough extraction.

Note: The Crystal Eye Dripper's structure adapts to personal brewing styles, offering an intuitive, customizable experience.

Recessed support design. Perfect filter fit.

The recessed design of the dripper ensures the filter paper stays securely in place, creating a flawlessly shaped coffee bed after brewing.

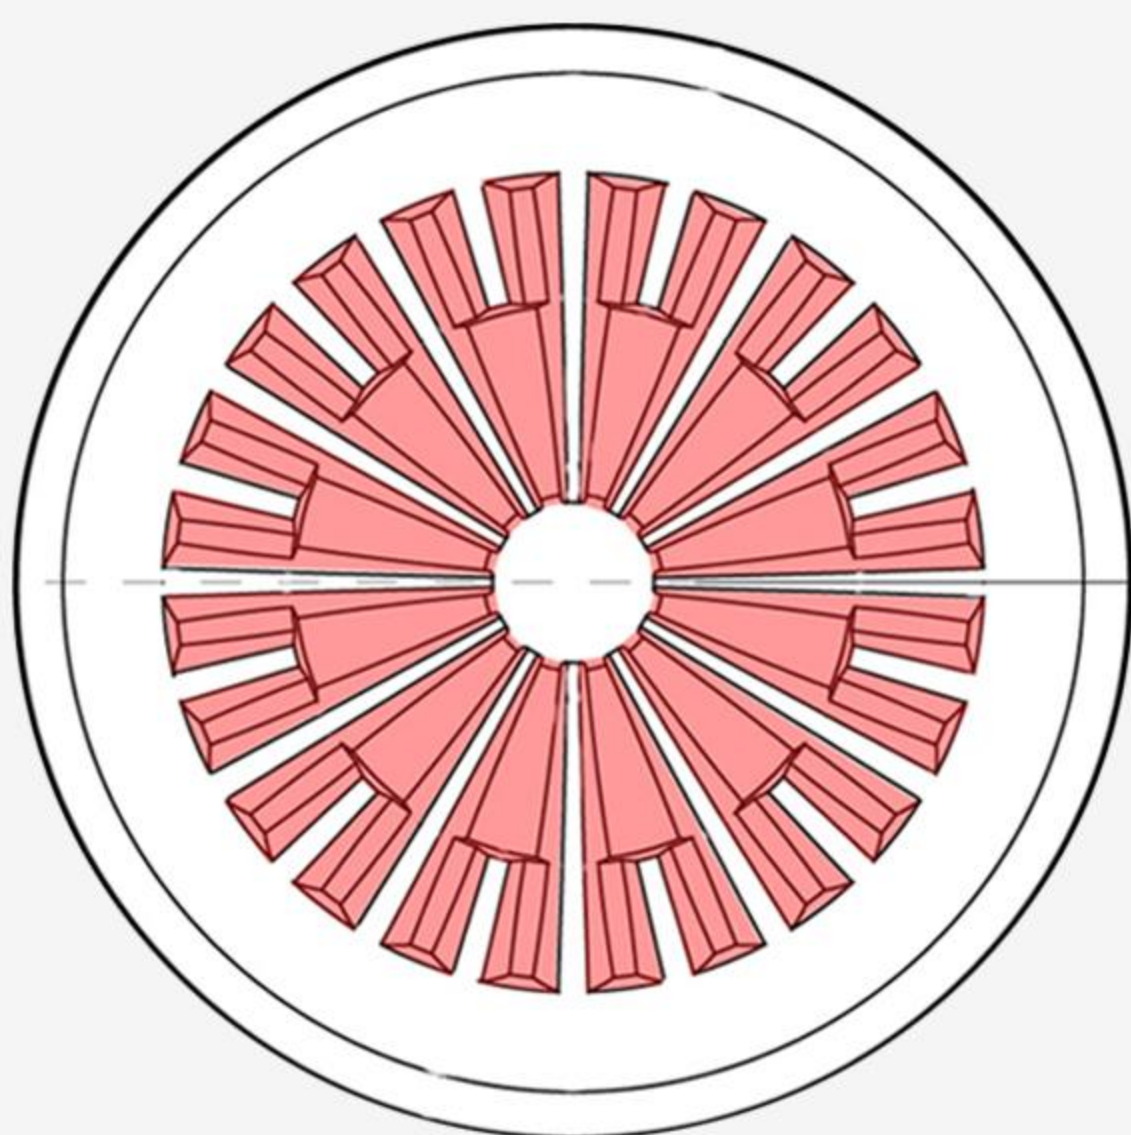

- ▲ The red-highlighted areas show where the filter paper adheres to the dripper, providing optimal contact for even extraction.

24 reasons for perfect flow.

The 24 grooves on the dripper expand drainage surface area, boosting water permeability for a smoother, more consistent flow — outpacing traditional conical drippers.

- ▲ The highlighted red zone shows the area where water flows freely after the filter paper adheres, offering significantly more permeability.

No more slow drainage or clogging from fine grounds — just the ideal flow for perfect pourover coffee.

Built to take the heat and the chill.

Made from high-borosilicate glass, Crystal Eye handles extreme temperature swings up to 150°C. The all-glass design brings your brewing process to life, adding a visual treat to every pour.

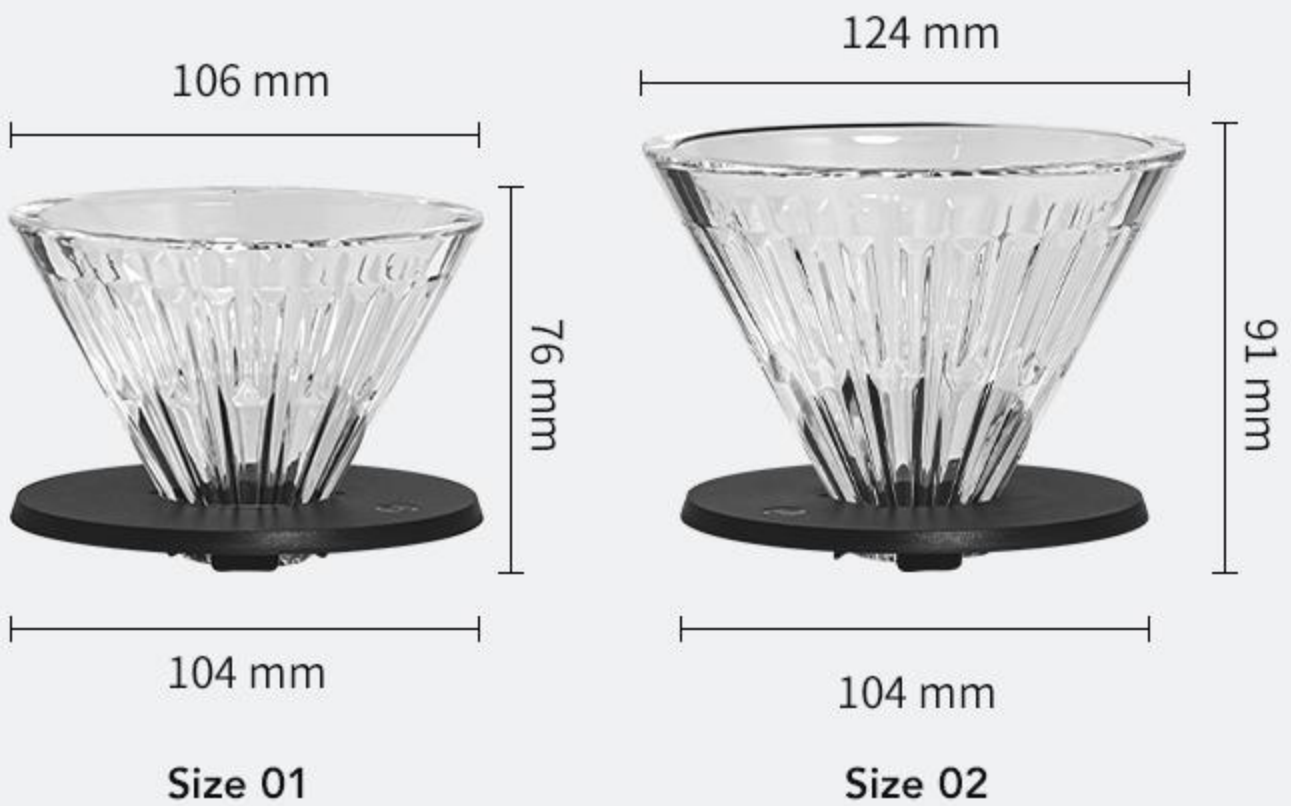

Where great coffee takes a stand.

Crystal Eye's non-slip, heat-resistant base keeps your brewing setup secure and stable, while its adaptable design fits your favorite cup or carafe. Plus, it detaches easily for quick cleaning.

Product Parameters

PRODUCT NAME

Crystal Eye Dripper Glass Version

COLORS

Black, White

SPECIFICATIONS

Size 01: Serves 1–2 people

Size 02: Serves 1–4 people

MATERIALS

Dripper: High-borosilicate glass

Base: PC (polycarbonate)

*All dimensions are manually measured and may vary slightly. Please refer to the actual product for precise details.

Heads up:

Due to the complexity of the dripper's design and glass special production, you might encounter the occasional bubble, watermark, or faint scratch.

**Bring competition-tier
flavor everywhere you go.**
