

Crystal Eye Travel Tumbler

# Your go to — to go.

We fused an insulated, ceramic-coated tumbler with our signature B75 Crystal Eye dripper. The result is an amazingly versatile pourover setup with unmatched portability. Coffee on the go has never tasted so good.

## Two In One Design

Simply brew, seal and savor.

## Tritan B75 Dripper

Super safe and super light.

## Road-Ready Tumbler

Durable and easy to hold.

## Vacuum Insulation

Seals in the heat for up to 12 hours.

# Your coffee copilot.

Wherever the road takes you, take your coffee along for the ride. At just 7.8 cm in diameter, our tumbler fits in most cup holders and bags.

# Travel light, brew right.

Most any journey can benefit from a caffeine boost. Weighing in at just 265 grams, pourover has never been more portable.

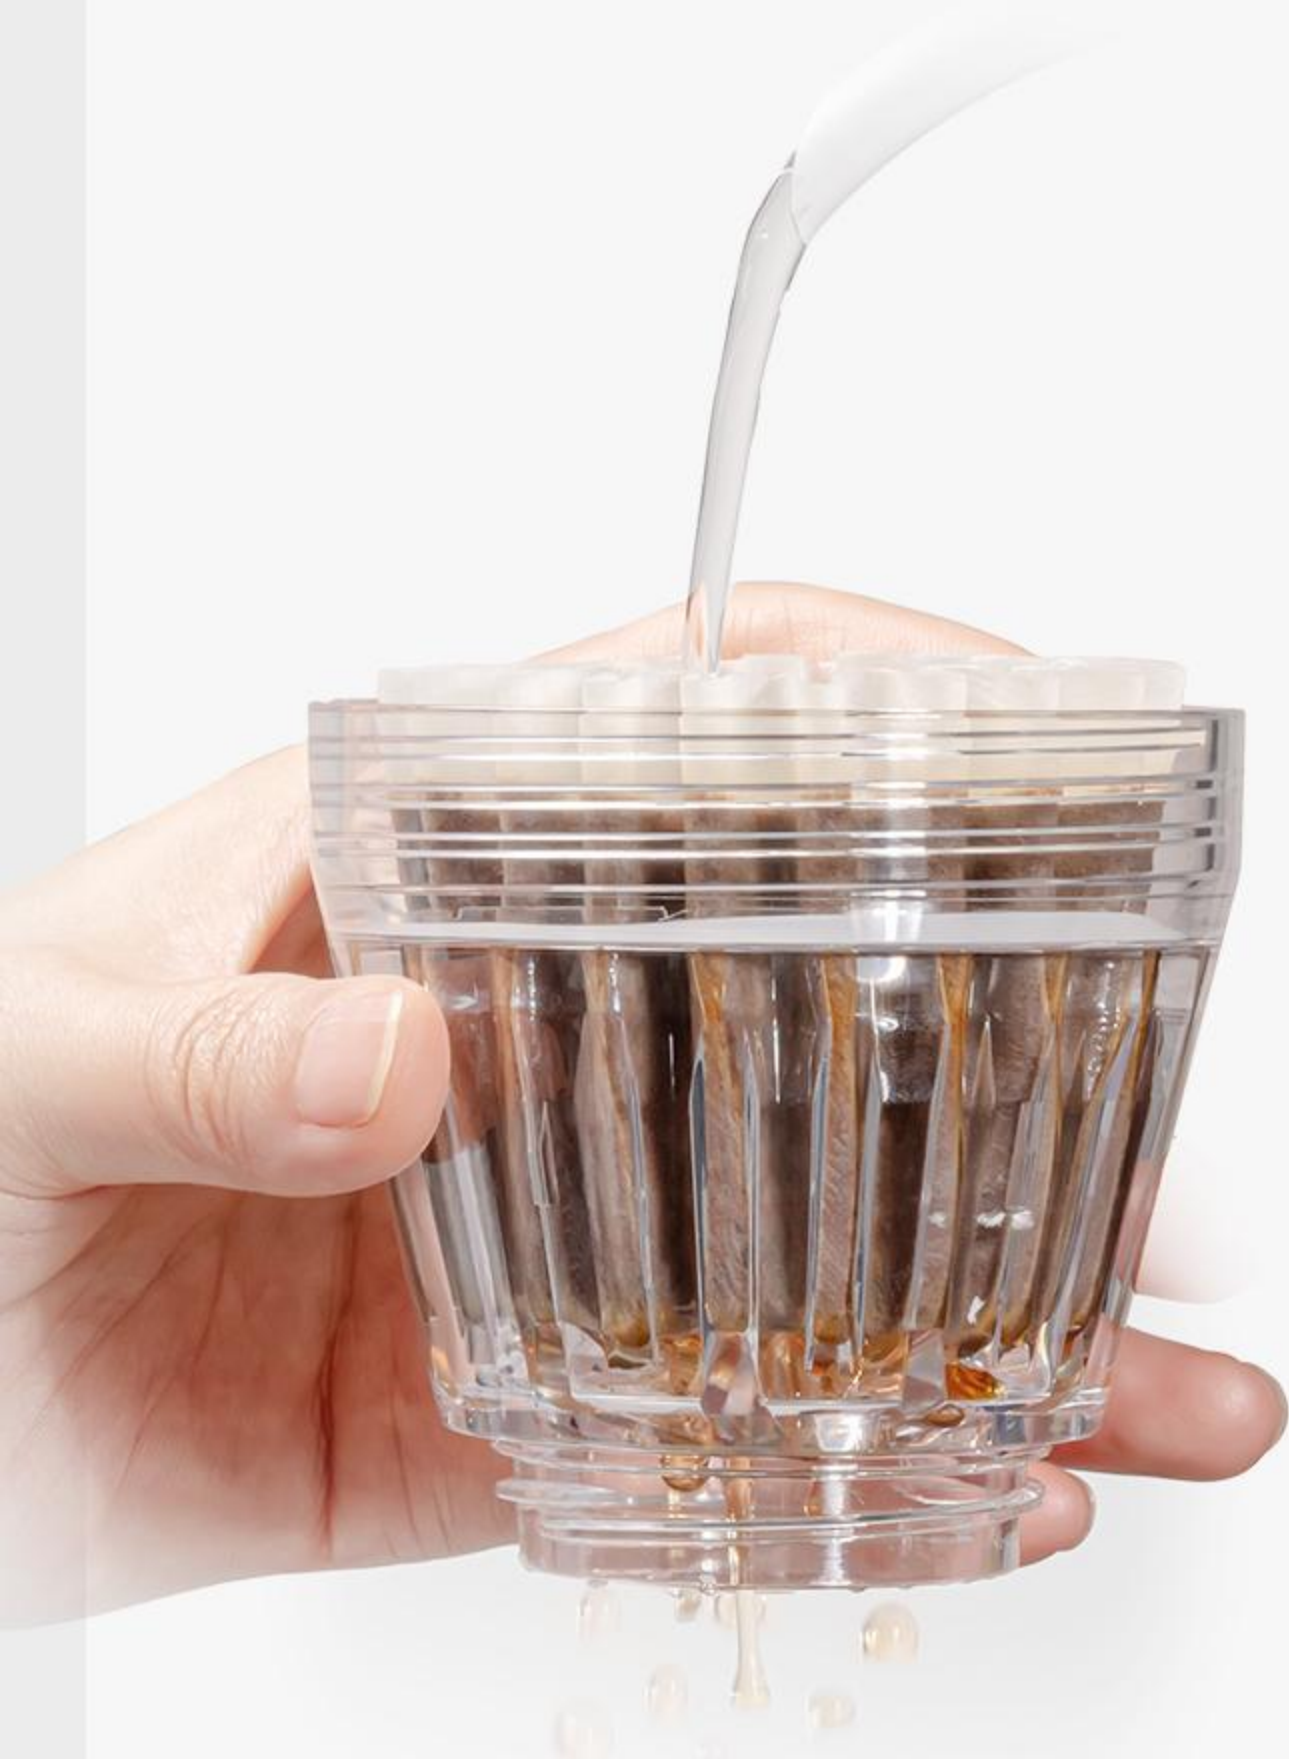

# Adventure is brewing.

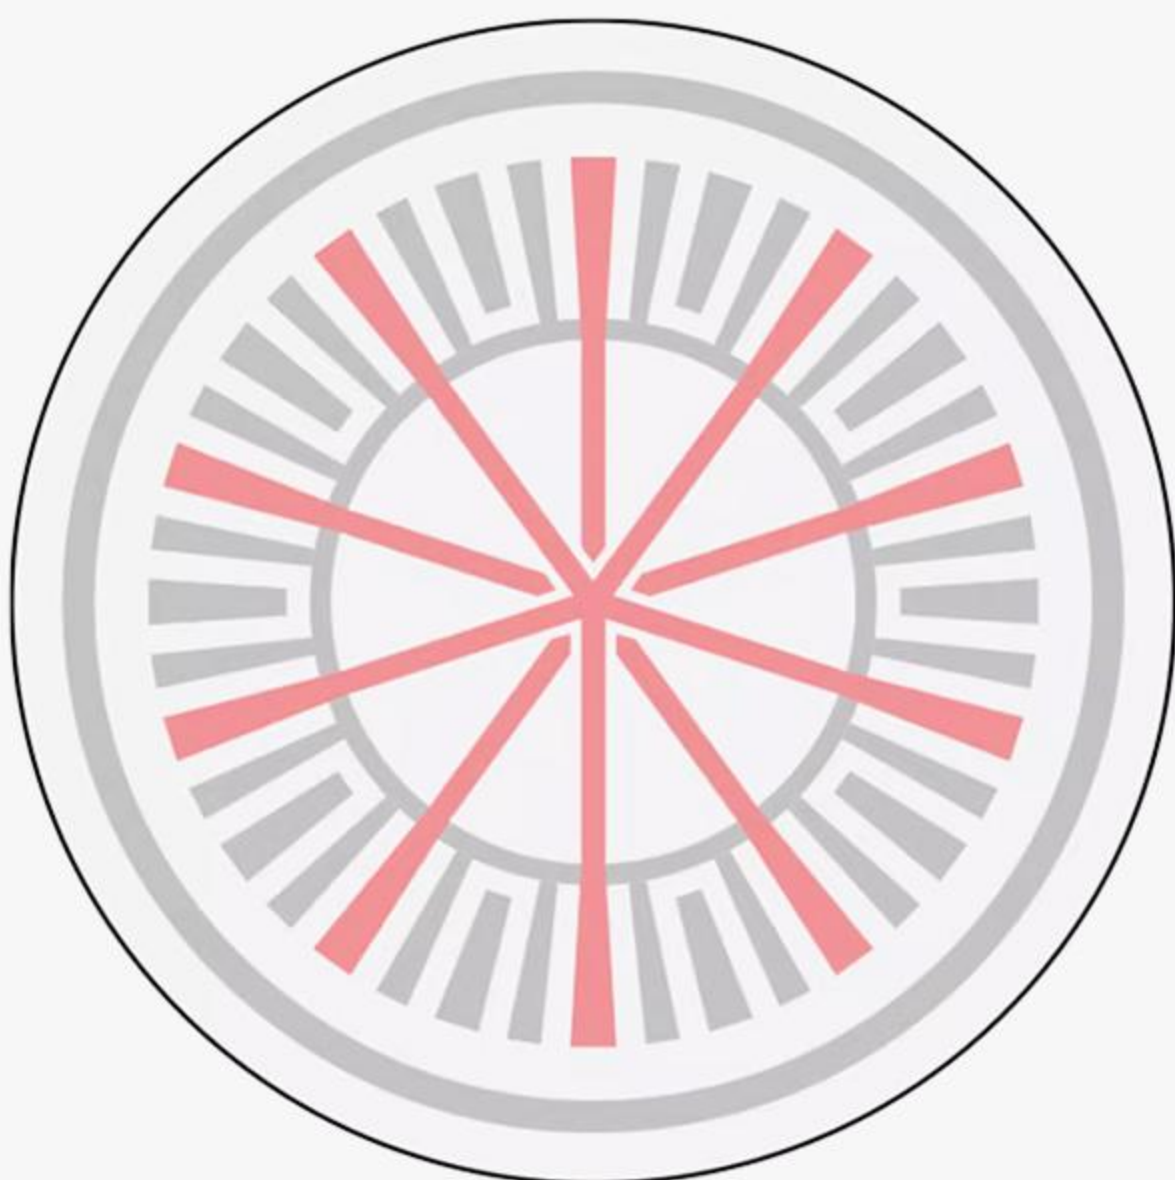

A flat bottom design improves extraction uniformity for exceptional sweetness and body.

Steep 75° walls improve flow rate.

20 concentric grooves maximize  
airflow and prevent stalls.

Dual-edge filter support  
system helps align and seat the filter.

Brew up to 13 g of coffee at a time.

# Dynamic. Ceramic.

Built with durable 304 stainless steel on the outside and a smooth ceramic-coated interior, this tumbler is purpose-made for great coffee. The tough stainless steel protects, while the ceramic coating preserves delicate flavors and aromas – and cleanup is a breeze since it's top-rack dishwasher safe.

\* To keep your cup looking and performing its best, opt for the soft side of your sponge and avoid contact with metal utensils. For stubborn stains, a simple soak in water usually does the trick.

\*\* While the tumbler is dishwasher safe, the included B75 dripper is not.

# Spotless in seconds.

No dishwasher? No sweat.  
The tumbler rinses clean in an instant.

# Keep hot or cool and carry on.

Stay toasty warm or refreshingly cool. The tumbler's double-walled, vacuum-insulated design locks in your drink's temperature for hours.

- ❶ Ceramic-coated inner liner
- ❷ 304 stainless steel inner wall
- ❸ Vacuum insulation layer
- ❹ 304 stainless steel outer wall
- ❺ Scratch and wear-resistant baked finish

**Upper Lid**

(B75 Dripper)**

**Tumbler Body**

# Hello thrills, goodbye spills.

We've got your back — and your bag. Our leak-proof design, with a secure threaded lid and silicone seal, lets you take your drink anywhere with confidence.

# A tumble-free tumbler.

An elegant sandblasted finish not only looks great but also provides a superior grip.

## Home

All the brewer you need for great coffee.

## On the Go

Take advantage of the dual-lid design for easy drinking.

## Office

Bring something new to the water cooler.

# Wide-open possibilities.

The Crystal Eye tumbler's 67 mm wide-mouth opening lets you brew and enjoy any coffee creation, from iced lattes to elaborate mochas.

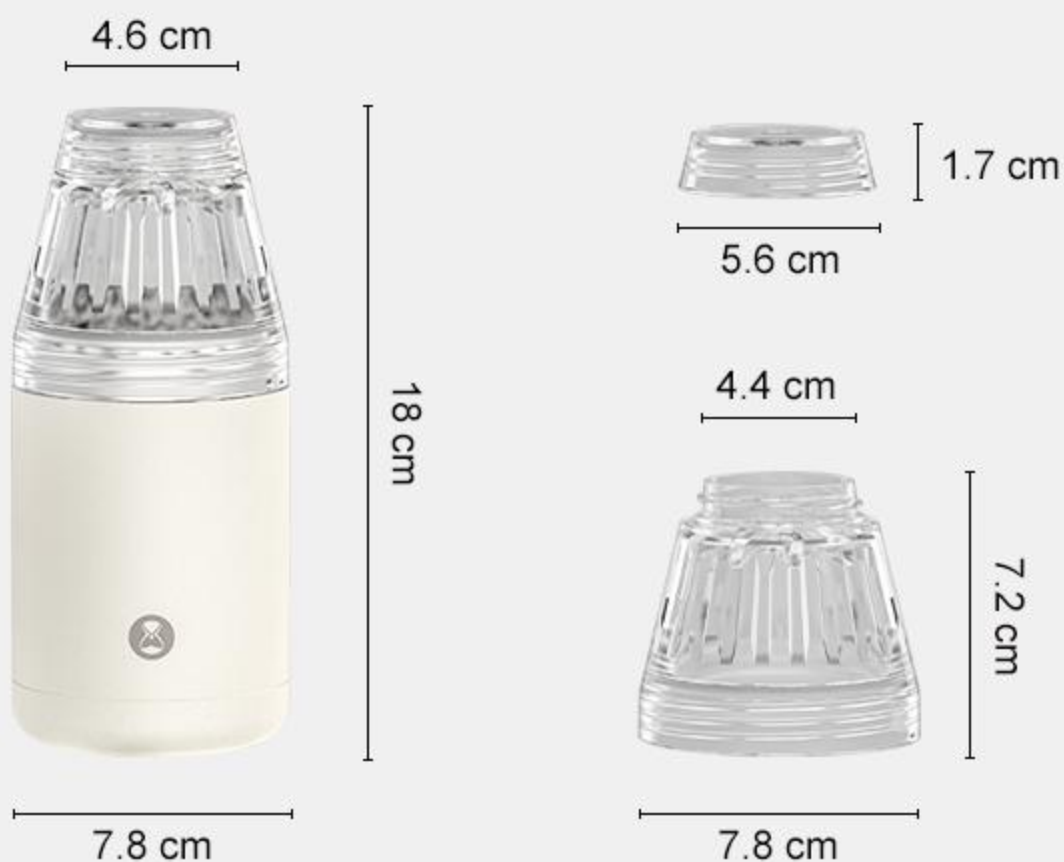

# Works for (almost) instant coffee, too.

Sometimes you need a coffee before you make coffee. Brew a single-serve drip directly into your tumbler, then savor it from the dripper which doubles as a cup.
