Professional and Beautiful

How to Use a Dripper

With the help of drip filter, brew a perfect cup of pour-over coffee with high efficiency

No brewing skills required, with just one simple pour wait and enjoy a wonderful coffee moment.

1. Saturate the coffee filter paper, then add around 15g of ground coffee to the dripper.
2. Position the SimpleDrip atop the coffee dripper.
3. Lift the lid and pour 200-250mL of water. Allow the water to gradually flow through the outlet into the dripper.
4. Cover the dripper with the lid to enhance the blooming of the coffee.
